

Ottercoin

Date	Changes
2024-07-30	Added link to dashboard resource summary page

Narrative:

Ottercoins are Jetty's very own fungible, and highly-divisible, coin. They're great for teaching how DEX swaps work, and are returned by JettySwap and LettySwap.

Ottercoins do not participate in creating RadMorphs - they're just for fun.

Game mechanic:

Ottercoins have no part in the game mechanic. They're just for fun and education.

Properties

Type

Fungible - divisibility of 18

Owner

Super Admin Badge holder

Roles:

Role	Rule	Updater Rule
minter	Admin Badge holder	OWNER
burner	OWNER	OWNER
other roles...	default (- freezer: deny_all - recaller: deny_all - withdrawer: allow_all - depositor: allow_all)	default (all deny_all)

metadata_setter	OWNER	OWNER
metadata_locker	OWNER	OWNER

Resource metadata:

metadata key	value (fixed)
--------------	---------------

icon_url	Ottercoin icon
name	Ottercoin
description	Ottercoin was created by RadQuest's guide otter, Jetty. Maybe you can buy some with a few Clams? Clams are a token that is fungible and highly divisible. That means every clam is worth just the same as another, and you can send and hold even tiny fractions of an ottercoin!
dapp_definitions	RadQuest dApp definition address
tags	vec!["radquest"]
