**Morph Energy Cards** are the source for the many shapes that RadMorphs can take.

They are found only in Gift Boxes from Jetty as the user completes quests. Each one allows Jetty to harness the primordial energies of the universe to combine **2 RadGems** into intricate, beautiful, and collectible **RadMorphs**. When a RadMorph is created using a Morph Energy Card, the card is consumed.

They have names that describe the energies that they harness.

Card **energy types** (with **energy description**):

- **Molten Lava** (... the fiery flow of molten lava)
- **Pyroclastic Flow** (... the boiling blast of a pyroclastic flow)
- **Volcanic Lightning** (... the high-altitude sparking of volcanic lightning)
- **Tropical Cyclone** (... the swirling vortex of a tropical cyclone)
- **Polar Blizzard** (... the furious freeze of a polar blizzard)
- **Earthquake Tremor** (... the oscillating overthrust of an earthquake tremor)
- **Fire Tornado** (... the searing swirl of a fire tornado)
- **Tidal Wave** (... the inescapable surges of a tidal wave)
- **Hydrothermal Vent** (... the steamy release of a hydrothermal vent)
- **Rainbow Curve** (... the prismatic power of a rainbow curve)
- **Storm Cell** (... the churning rotations of a storm cell)
- **Solar Flare** (... the shooting jet of a solar flare)
- **Nuclear Fusion** (... the tumultuous turmoil of nuclear fusion)
- **Aurora Borealis** (... the ethereal energies of the aurora borealis)
- **Gravity Force** (... the distorting interactions of the gravity force)
- **Magnetic Field** (... the ineluctable intensity of a magnetic field)
- **Gamma Rays** (... the invisible frequencies of gamma rays)
- **Black Hole** (...the unseen unknowns of a black hole )
- **Supernova Explosion** (... the galactic strength of a supernova explosion)
- **Whirlpool Spiral** (... the sinking gyre of a whirlpool spiral)

## Game mechanic:

**Morph Energy Cards** are collected randomly by opening Gift Boxes. Some cards are always available, but some are limited-edition; once a limited-edition card is no longer available, Gift Boxes will never return them (regardless of when the user got the box).

The definition of the Gift Boxes defines how often different rarities of cards are returned from each box. Within a given rarity, each card is returned equally (including both limited and non-limited cards).
