

RadGems

Date	Changes
2024-07-30	Added link to dashboard resource summary page

Narrative:

RadGems, created randomly from Elements, are the raw source of the color and material of the RadMorphs that users will create.

Jetty can use his deep knowledge of the power of the Radix Network to fuse **5 Elements** into one of a random set of **RadGems** of different colors and materials.

Radgem colors (with the codes used in the image files):

- **forest** (lime green - LGN)
- **sand** (yellow - YEL)
- **sky** (light blue - LBL)
- **coral** (pink - PNK)
- **blood** (red - RED)
- **smoke** (grey - GRY)
- **ocean** (blue - BLU)
- **flame** (orange - ORN)
- **glacier** (mint green - MGN)
- **dusk** (purple - PRP)

Radgem materials (with a certain rarity):

- **crystalline** (common)
- **metallic** (rare)
- **radiant** (ultra-rare)

Each RadGem also comes with a **quality** value, where more rare materials are of higher average quality, but there is some random variation.

Game mechanic:

RadGems are never given directly as rewards - they are always generated randomly from **5 Elements**.

When a RadGem is created:

- The color is selected randomly, with equal weight to all colors
- The material is selected randomly, with different weights given to each material
- The quality is an integer and is generated randomly, within a mix/max range that is defined for each material

Properties

Type

Non-fungible

Owner

Super Admin Badge holder

Roles

Role	Rule	Updater Rule
minter	Admin Badge holder	OWNER
burner	Admin Badge holder	OWNER
non_fungible_data_updater	Admin Badge holder	OWNER
other roles...	default (• freezer: deny_all • recaller: deny_all • withdrawer: allow_all • depositor: allow_all)	default (all deny_all)

Metadata Roles:

Role	Rule	Updater Rule
metadata_setter	OWNER	OWNER
metadata_locker	OWNER	OWNER

Resource metadata:

metadata key	value (fixed)
icon_url	RadGems generic icon
name	RadGems
description	Two RadGems can be combined with a Morph Energy Card by RadQuest's Jetty to produce a beautiful RadMorph NFT. Higher quality RadGems will contribute to a higher quality RadMorph.
dapp_definitions	RadQuest dApp definition address
tags	vec!["radquest"]

Non-fungible data:

NFdata key	value construction	example value
key_image_url	Image of RadGem of correct color/material	
name	[Material] [Color] RadGem {{quality}}	Metallic Smoke RadGem {11}
description	The [rarity] [material] material of this [color] RadGem is graded at a quality of [quality] out of a possible 25.	The rare metallic material of this Smoke RadGem is graded at a quality of 11 out of a possible 25.
color	[color, random]	smoke

material	[material, weighted random]	metallic
rarity	[rarity, set by material]	rare
quality	[random integer, range defined per material]	11
