

QUICK REFERENCE

Brand Guide

Logos

Full Logo

Always use the original version of the logo in every use case, if not here are some examples of how to use the logo:

We use the Radix logo when branding anything Radix.

White on Radix Blue

White on Radix Black

Gradient Background with drop shadow

Do not outline the logo.

Do not distort or alter the logo.

Do not use any drop shadows or effects on a plain background.

Do not recolor the logo.

Clear Space

When using the logo in corner placements, ensure the clear spacing is met as indicated above.

Optical Spacing

When positioning the logo centrally, ensure optical spacing is met as indicated above.

Minimum Size

Digital: 70px
Print: 40mm

Radix Icon

Always use the original version of the icon in every use case, if not here are some examples of how to use the icon:

We use the Radix icon for square profile images and favicons. We never use the Radix icon in isolation, the Radix logo or name should always be present for context.

White on Radix Black

Green on Radix Grey

Green on white background

White on gradient background

Do not distort or alter the icon.

Do not outline the icon.

Do not recolor the icon.

Minimum Size

Digital: 16px (Favicon)

eRadix Icon

Always use the original version of the icon in every use case, if not here are some examples of how to use the icon:

We use the eRadix icon for round Radix profile images, e.g. Coinbase. We never use the eRadix icon in isolation, the Radix logo or name should always be present for context.

White on Radix Black

Green on Radix Grey

Green on white background

White on gradient background

Do not distort or alter the icon.

Do not outline the icon.

Do not recolor the icon.

Minimum Size

Digital: 16px

Scripto Icon

Always use the original version of the icon in every use case, if not here are some examples of how to use the icon:

We use the Scripto icon when talking about Scripto. We never use the Scripto icon in isolation, the Radix logo or name should always be present for context.

Do not distort or alter the icon.

Do not outline the icon.

Do not recolor the icon.

Do not alter the gradient background

Minimum Size

Digital: 25px

RADIX GREY 5 #F4F5F9	RADIX WHITE #FFFFFF

Color Usage

- ✔

Use base colors for backgrounds and large color blocks.
- ✔

Use accent colors for all quotes and accents, use sparingly.
- ✖

Don't use accent colors for backgrounds or large color blocks.
- ✖

Don't use tints or shades of our colors to make your own.

Gradients

Radix

When talking about Radix, you should use gradients with the pink(s), bright blue and green(s). The blues create a base and the brighter colors are used as accents to create depth.

Community, Ecosystem, DeFi and Crypto

When talking about community, ecosystem, DeFi and/or crypto, we use blue-green gradients. We use the core Radix blues as a base and the brighter colors are used as accents to create depth.

Developers

When talking about developers, we use blue-pink gradients. We use the core Radix blues as a base and the brighter colors are used as accents to create depth.

Type

IBM Plex Sans - Bold

Headline Typeface

IBM Plex Sans - Semibold

Large and Small Typeface

IBM Plex Sans - Regular

Body Typeface

Writing Style

Title Case

Use Title Case for all Title, Large and Small Headlines.
Use sentence case for all copy.

Do not make fonts multicolored.

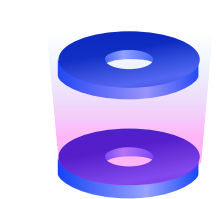

Accent colors should be used sparingly and with purpose, to draw attention to a quote, message or a particular part of a page.

Layout - Four People

Lower Thirds

Lower third name tags to be used in instances, where interview style footage is filmed.

Name Tag - Gradient Background

Name Tag - White Background

General Use Cases

Logo Placement

Full Screen Video (no gradient backgrounds)

Logo should always be fixed and placed in the top left corner throughout the video with the exception of the opening frame. A light dropshadow should be applied to ensure visibility on different backgrounds. Please refer to our logo section for more guidance on how to use the logos.

Lower Third Name Tag Placement

The lower third name tag should always sit above the video control panel to ensure good visibility.
